

# DID YOU KNOW?

News You Need To Know • Looking at the Seven Mountains of Culture • “And the government will be upon His shoulder.” Isaiah 9:6

## A SHIFT IS OCCURING By Barbara Sieber

The wind of conservatism is blowing stronger. More people are abandoning the party of the far left, recognizing it does not represent them anymore. “Trump SKYROCKETS With Young, Hispanic, Black Voters” (yougov.com poll, Youtube). Recognizing the impending loss in the 2024 election, the media is turning on Biden, something they would never do before.<sup>(1)</sup> Politico admitted Joe Biden and his brother James were involved in a lucrative deal with Americore, a financially distressed hospital system, which bankrupted that company. It was part of an attempt to defraud Medicare of \$200 million.<sup>(2)</sup>

There’s a shift in the public’s perception of AI. Google’s dubious AI chatbot, Gemini, displayed a distinct political bias. “The tool was generating images that were factually and historically incorrect...black Vikings, female NHL players, diverse versions of America’s Founding Fathers ...an Asian woman dressed in a Nazi-era German soldier’s uniform.”<sup>(3)</sup> It appears the system had been “built to reflect the diversity of the world.”—at truth’s expense.<sup>(4)</sup> Google inserted a code that changes the search terms being used. Using a back door mechanism, it changes the words inputted so you get images Google wants you to see, not what you want to see.<sup>(5)</sup> This raised quite a ruckus! It also cost them \$70 billion in equity in one day.<sup>(3)</sup> While Google’s missteps with AI are unfortunate because it could be a force for good, it serves as a word to the wise. Information is easily manipulated.

Yet another shift...“A Monmouth poll released 2/26/24 shows that 53% of Americans now support building a wall on the southern border with Mexico... Four years ago, only 42%, supported it. The poll also shows that 84% of voters see illegal immigration as a very serious...issue, a number that has grown significantly since 2019.”<sup>(3)</sup>

Online agnostic personality Joe Rogan seems to have experienced a kind of spiritual shift on air. Speaking of religion’s guidelines of behavior vs man’s assumption of inherent goodness and personally derived moral compass, he comes to the stunning conclusion (on air!) that “We need Jesus. I think for real...come back...now’s a good time.”<sup>(6)</sup>

## THE FOOD CRISIS NO ONE IS TALKING ABOUT By Candy Giles

We are aware of higher food prices but no one is talking about shortages that are already here and increasing. Nor do they recognize that this is deliberate.

As many as 783 million people worldwide are facing chronic hunger. That’s more than double the population of the United States. In some places, there is widespread starvation (like in war-torn Sudan.) Over the past ten years, it has continued to worsen. “A food crisis of unprecedented proportions is unfolding right in front of our eyes...”<sup>(1)</sup> This is what the global elites, sometimes called “controligarchs” want.<sup>(2)</sup> They have been attempting to control the global food system for years, causing shortages leading to higher prices and starvation. Globalist Dennis Meadows, commissioned by the Club of Rome to pen the 1972 manifesto *Limits of Growth*, wrote “We are going to have a billion people [current world population is 8 billion]...we have to get back down...that’s what lies ahead.”<sup>(3)</sup> (see past DYK articles: “What Do We Need Humans For?” in Feb. 2024; “Georgia Guidestones” in Oct. 2022; and “Agenda 2023 in Jan. 2024)

These elites use or cause global unrest. They like famines, epidemics, revolutions, and lower standards of living. One of their greatest “successes” is over **one billion babies aborted** in the last century.<sup>(3)</sup> They are all for the cost of fertilizer skyrocketing, and farmers passing the costs along to consumers. Russia is the largest exporter of fertilizer and the conflict there has affected supply. The recent suspicious wildfire in Texas is devastating for an already struggling cattle industry.<sup>(4)</sup> Add to that, the climate alarmists’ opposition to cattle! Cattle inventories have decreased 8.1% since 2019!<sup>(5)</sup>

Climate policies and plans to cut livestock production in half have enraged farmers—causing massive protests in Europe. “Net Zero” policies to reduce carbon dioxide emissions into our atmosphere increase their costs tremendously. (Carbon dioxide is *necessary* for photosynthesis! The climate alarmists are lying.) Saving the planet is an excuse for the World Economic Forum, European Union, and the U.N. to shut down small, family-owned farms and take more control. Their goal is to “transfer power and control away from countries, away from individuals.” They say, “You control the food, you control the people.”<sup>(2)</sup>

This can seem like a hopeless situation, but please read the “Loaves and Fish” article in this issue.

## AHHHH, MONTANA... By Laurie Ortiz

The beauty of God's creation is so wonderful in Montana! There you'll find majestic mountains and wide open plains, rivers, lakes, and natural hot springs. It's rich with Native American history and endless seasonal activities, making it a perfect vacation destination.<sup>(1)</sup> If that's not enough, the most recent attractions are the Sinaloa and the Jalisco New Generation cartels (CJNG)! More than 1,300 miles north of the wide open border, the cartels set up shop...on Native American reservations! They target single women, pursue them, and then use their homes for cartel operations.

Since drug addiction is already prevalent on the reservations, they have become prime targets. Fentanyl pills that sell for up to \$5 in any major U.S. city can sell for \$100 in remote Montana. The situation is exacerbated by the lack of officers. For example, "The Northern Cheyenne tribe relies on two federally funded Bureau of Indian Affairs tribal police officers per shift to patrol more than 440,000 acres of land, home to roughly 6,000 residents..." Add to this, reservations are sovereign nations, so local police cannot operate there without a tribal agreement.<sup>(2)</sup>

Meanwhile, south of the border... *(continued on page 4)*

## CENSORSHIP By Barbara Sieber

From 2000-2016, the internet was a pure form of democracy, an ecosystem of information. The 2016 election of Trump and the Brexit movement, which threatened the "rules-based international order" of the European Union, changed all that with the introduction of "The Revenge of The Gatekeepers." The powers that be could not tolerate the political turbulence that social media brought.<sup>(1)</sup>

The gatekeepers have even introduced new terminology: Misinformation (wrong information),<sup>(2)</sup> Disinformation (deliberately misleading information), and Malinformation (new word! truth used to inflict harm).<sup>(2)</sup> Fact-checkers employ these terms to justify censorship.

The gatekeepers are comprised of five powerful forces. They are identified by Mike Benz, the executive director of the Foundation for Freedom Online and a former State Department diplomat under the Trump administration:

Government: DHS, FBI, State Department, National Science Foundation, CIA, National Endowment for Democracy. For Covid issues: HHS, NIH, CDC, NIAID.

Private Sector: tech platforms employing algorithms, the private companies creating machine learning and AI intelligence.

The Corporate Social Responsibility Movement: companies policing their employees' and corporate activities: investing in "socially responsible" investments, investing in censorship companies.

Civil Society: universities, NGOs, activists, nonprofits, foundations.

News Media and Fact-Checkers: "the politically like-minded within the media, propped up by the government, the private sector, the civil society ...All five ...in concert have been fused into basically the nucleus of a single atom." "It's a whole of society effort."<sup>(1)</sup>

When reporter Matt Taibbi (Racket News, Substack) reviewed Elon Musk's newly purchased company, he found that the Twitter files revealed only a drop of the bucket of the revelation of the censorship attack against Americans. There, the censorship of individuals was revealed. Now it's become clear that the government is pursuing mass censorship of society as a whole. Mark Zuckerberg's "creation" originated as a DARPA run (DOD-funded) surveillance program that was eliminated and reborn as the publicly embraced Facebook.<sup>(3)</sup> Facebook is now the largest social network worldwide, with over 3 billion users.<sup>(4)</sup>

A battle is brewing in Congress about how much power the tech community can wield against us. This is a fight for freedom - free speech, fair elections, the right to bear arms, religion, family, and economic prosperity.

## "SLAUGHTER-FREE" vs LAB GROWN MEAT By Ken Wolf

So. What is lab-grown meat? Lab-grown meat doesn't come from slaughtered animals. Instead, it comes from harvesting the cells of a living animal. Then a lab technician places the harvested cells in bioreactors before adding them to a bath of nutrients. The cells grow and multiply, producing muscle tissue. Some lab-grown meat contains an animal by-product known as fetal bovine serum (FBS). Slaughterhouses obtain fetal bovine serum by collecting blood from the unborn calves of pregnant cows after they're killed.<sup>(1)</sup>

Here are some who are investing in lab-grown meat: Upside Foods, Tyson, Cargill, and Bill Gates. Upside Foods owns a patent on the technology.

Some think that factory farm facilities are disastrous for the environment, nearby communities, consumer health, and animal welfare. Yet others believe that regenerative agriculture\* helps the environment. (Think of large herds of buffalo roaming the prairie where they both prospered.)

Alliance for Natural Health (ANH) cites a study from UC Davis showing that lab-grown meat may have a greater carbon footprint than retail beef. Livestock raised with regenerative agricultural practices would have an even smaller carbon footprint.

Some regenerative farmers would prefer that their animals have only one bad day.

Is it reasonable to think that artificially growing something that resembles meat is equivalent to meat from live animals—especially those allowed to graze and move around in the sun?

\*Regenerative agriculture is a way of farming that focuses on soil health. When soil is healthy, it produces more food and nutrition, stores more carbon, and increases biodiversity.<sup>(2)</sup>

# THE DOCTRINE OF THE LESSER MAGISTRATES

By Lee Bradley

\* *DISCLAIMER. Please read the entire article to know the spirit in which it is written. DYK in no way advocates violence or condones actions that cause harm to others.*

"The doctrine of the lesser magistrate is a unique Christian theory of resistance to authority which was first detailed in the Magdeburg Confession of 1550. This doctrine teaches that when a ruler has become an incorrigible tyrant (*within a limited set of criteria*), he has abdicated his claim to legitimacy. Consequently, those Magistrates with lesser authority under him may defy and resist the illegitimate magistrate (and his unjust laws) for the sake of protecting others."<sup>(1)</sup> It declares that all authority is given by God and all law is to be obeyed unless they go against God's laws.

A few examples are:

Roman Emperor Trajan gave a sword to a centurion saying, "Use this sword against my enemies if I give righteous commands; but if I give unrighteous commands, use it against me."<sup>(2)</sup>

Martin Luther was ordered by Pope Leo X to renounce his Ninety-five Theses. He refused.

Church rebels (calling themselves The Army of God)<sup>(3)</sup> and English barons turned against King John for his tyranny and forced him to sign the Magna Carta in 1215. The American colonists used the Magna Carta as a model when demanding their liberty, which led to the American Revolution, the Constitution, and Bill of Rights.<sup>(4)</sup>

(continued on page 4)

## WASSUP NY? By Laurie Ortiz

Have you been keeping up with New York news lately? Are you getting lost in all the regulations, and backroom deals in the dead of night? Welcome to NY, where that game has been perfected! But how?? I'm glad you asked! All it takes is a supermajority of like-minded people belonging to the same political party—then the sky's the limit!! When the party that's in the majority doesn't like the way things are going, which might cause them to lose their majority status...they just change the existing laws to suit their desires!

So it goes with **redistricting**. In the past, NYS district voting maps were drawn by the state legislature until voters grew tired of the gerrymandering (drawing boundaries that give one party the advantage).<sup>(1)</sup> A 2014 vote resulted in the creation of the bipartisan IRC (Independent Redistricting Commission), which was codified through a state Constitutional amendment. In 2018 Republicans lost the Senate, leading to one-party rule. Since then, the Democrats have changed the laws, allowing the maps to be redrawn three times in violation of the state constitution—gerrymandering once again.<sup>(2)</sup> For more information, see <https://stopnycorruption.com>.

The **quarantine camps**. Bobbie Ann Cox sued Gov. Hochul and NYSDOH over this unconstitutional plan and won. However, Hochul & Co. weren't happy, so they appealed to the appellate court consisting of five gov't-appointed judges who ruled that the case had "no standing." Bobby Ann is now bringing it to the state Supreme Court.<sup>(3)</sup>

Monroe County has decided to purchase the controversial touchscreen **voting machines**. Usage will begin in 2025, pending litigation. *Due to fear of retribution, the source of this information has requested to remain anonymous.*

The NY **Equal Rights Amendment** (ERA) will be on the ballot in November. Cloaked in "social justice," vague language has been added to the already existing law that will infringe on parental rights, and the rights of all people of faith. We must vote NO!<sup>(4)</sup>

Interested in voting? Need to change your party affiliation, address, phone no.?

# IT JUST TAKES TWO LOAVES & FIVE FISHES

By Candy Giles

The Bible tells of a time when Jesus fed 5000 men (plus women and children). It seemed impossible, but He used a small offering of five loaves and two fish to feed *everyone*. (Matthew 14) As we look at the overwhelming statistics on world hunger, when we yield and give to Jesus what we have, He will use it.

We can also pray! The evil men behind this depopulation agenda seem too powerful.<sup>(1)</sup> For us, yes, but not for God. The Bible is full of impossible situations turned around by God in response to faith. (Red Sea, Goliath, Gideon's army, Lazarus).

On a practical level, we should have extra food and water on hand for ourselves, our families, and our neighbors, if possible. (God had Joseph prepare to feed many.) James Nelson, a prepping expert, says, "Anybody who doesn't have 3 to 6 months of basic staples and food within your home and the ability to grow a garden, then what is your plan?"<sup>(2)</sup> The gov't agency FEMA even suggests that you have at least two weeks of food and water.<sup>(3)</sup> If that seems too much to do, do what you can and trust God. Our most important preparation, however, is spiritual.<sup>(4)</sup>

If you have some "loaves & fishes" (either your time, talent, or treasure), look to give locally. You can look online for organizations, or consider these:

**Bethel Express:** Focuses on the spiritual strength, social stability & scholastic success of our city's kids, while providing them with weekly meals.<sup>(5)</sup>

**The Fathers Heart:** *A mobile kitchen for Christ.* Their website states, "Rochester has three zip codes with food insecurities that rank in the top ten for NYS."<sup>(6)</sup>

**Go Ministries:** They host a youth group for city teens, a clothing center, and food pantry<sup>(7)</sup>

Outside of Rochester there are many giving opportunities. Here are just two:

**Samaritan's Purse:** Worldwide disaster relief, with food and supplies.<sup>(6)</sup>

**Upendo Children's Village:** An orphanage of 50+ children in Africa, supported by a network of Christian churches and ministries in Rochester, NY.<sup>(7)</sup>

*Give, and it will be given to you.*

Luke 6:38

## MONTANA... (cont' from pg. 2)

A camp, named San Vicente, has been set up to receive “migrants” at the northern exit from the Darien Gap—a segment of jungle between Colombia and Panama. Once through the jungle, “migrants” usually board buses to make their way to the U.S. via Highway 1. This camp, known as “China Camp,” is funded by China, the UN, and DHS through front organizations such as “UN Migration”<sup>(3)</sup> and “HIAS Refugees.”<sup>(4)</sup> The Panamanian government wants the camp closed, but efforts are blocked by the WEF, CCP, and the U.S. Embassy. It is a “war camp.”<sup>(5)</sup>

Gordon Chang, Sr. Fellow at the Gatestone Institute writes, “There is now a Chinese invasion of the U.S. homeland.” A Border Patrol sector chief stated at a press conference that some of the Chinese coming across our border have “known ties to the PLA”. (China’s People’s Liberation Army)<sup>(6)</sup>

## DOCTRINE OF THE LESSER (cont' from pg. 3)

In the Bible: the midwives disobeyed Pharaoh; Daniel refused to bow to Nebuchadnezzar’s statue; Shadrach, Meshach, and Abednego faced the fiery furnace. Peter and John said in Acts 4:19, “we need to be right in the sight of God rather than listen to you.” Paul wrote Epistles from prison.

When God’s laws are violated, and man’s laws are deemed immoral or unrighteous, it is our duty to stand for God’s righteousness and resist if needed. Otherwise, we are to obey man’s laws and pray for those in authority over us. (1 Tim 2:1-2 KJV) “I exhort therefore, that, first of all, supplications, prayers, intercessions, and giving thanks be made for all men. For kings, and for all that are in authority; that we may lead a quiet and peaceable life in all godliness and honesty.”

Modern-day examples that illustrate the Doctrine of Lesser Magistrates are the Civil Rights Movement of the 1960s—where man’s laws were discriminatory and NOT in alignment with God’s laws—and Mahatma Gandhi’s pursuit of independence for India.

More recently, we’re seeing Gov. Abbott act as the Lesser Magistrate. Our borders have been left unprotected. Approx. 22 million<sup>(5)</sup> illegals have entered our country with no accountability or regard for our rule of law. They receive housing in schools, hotels, apartment buildings, and other benefits,<sup>(6)</sup> while our vets and homeless citizens are on the streets. Texas said, “Enough,” and is protecting its borders. Finishing the wall Biden halted 3 years ago, using shipping containers<sup>(7)</sup> and razor wire,<sup>(8)</sup> they are defying the federal government.

Currently, our government is now generating laws and orders that are unconstitutional. Likewise, we find Media, “Big Pharma,” and three-letter agencies supporting the agendas of the New World Order, much of which is contrary to God’s laws and His Word.

Our founding fathers wrote the Constitution, then the Bill of Rights, to ensure our rights would not be trampled upon. We, as the church, are obligated to speak God’s truth and His laws, to interpose when needed, be salt and light in society, and be willing to lay down our lives when we have to. It is the transforming power of Christ’s love and his shed blood that gives power and authority to overcome when man’s laws try to replace God’s rule and law.
