

## DID YOU KNOW?

Looking at the Seven Mountains of Culture • Reporting Current Events so that We Are “Wise As Serpents.”

### DID YOU HEAR *THIS* IN THE NEWS?

By Candy Giles & Barbara Sieber

Director of Research and Development Jordan Walker was caught on tape bragging to a Project Veritas journalist that his company, Pfizer Pharmaceuticals, is manipulating Covid viruses for profit.

“One of the things we’re exploring is like, why don’t we just mutate it (Covid) ourselves so we could create - preemptively develop new vaccines, right? The way it (the experiment) would work is that we put the virus in monkeys, and we successively cause them to keep infecting each other, and we collect serial samples from them.”

“Don’t tell anyone”, he later pleaded. “Promise you won’t tell anyone.”<sup>(1)</sup>

In a separate Project Veritas video, the journalist replied to Walker, “It sounds like Gain-of-Function to me.” Walker denied this and claimed that it is not, but rather it is “directed evolution.”<sup>(2)</sup> Apparently Pfizer is changing the name to avoid guilt. This is the same ploy Dr. Fauci, head of the NIH, used to lie under oath about his role in Gain-of-Function research in the Wuhan lab in China.<sup>(3)</sup> Mr. Walker also stated Covid was, indeed, a lab leak.<sup>(2)</sup>

Pfizer denies Gain-of-Function research, but by definition, it allows scientists to tweak existing pathogens to make them more lethal.<sup>(4)</sup> No matter the name, Pfizer has found a gold mine by creating a disease they can cure.

The Project Veritas interview can be seen on Rumble and Twitter. It has been scrubbed from Google and YouTube.

### THEY SOLD US A LEMON!

By Laurie Ortiz

The 1st Amendment of our U.S. Constitution contains what is known as “The Establishment Clause,” which reads: *Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof.* As our society has become increasingly secularized, this clause came to be wrongly interpreted as to establish the separation of church and state. Over these many decades there has been an ongoing battle over the public display of anything Judeo-Christian or overtly religious. Prayer was removed from school; the Ten Commandments were removed from courtrooms and other public properties; Christmas and Hanukkah displays were banned from public areas, and on and on. Until...

In 2015, Coach Joe Kennedy was suspended and subsequently fired for quietly kneeling in prayer after football games in Washington State, due to parental complaints.<sup>(1)</sup> The case made its way through the lower courts, then to the Supreme Court which sent it back to the District Court. Fast forward to September 2021; the case was refiled to SCOTUS, who agreed to hear it.<sup>(2)</sup>

In June 2022, in a 6-3 decision, the court ruled in Coach Kennedy’s favor. Justice Gorsuch wrote “The Constitution and the best of our traditions counsel mutual respect and tolerance, not censorship and suppression, for religious and nonreligious views alike.”<sup>(3)</sup>

So, what’s the lemon?

A supreme court case in 1971—Lemon v. Kurtzman—argued against state funding of some aspects of non-secular, non-public education, stating that it violated the Establishment Clause. At that time the court developed a three-pronged test that such cases would be judged by, known as the LEMON test. A government action would be imposed if it violated one or more of these prongs: 1) lacks a secular purpose; 2) has the primary effect of promoting or disparaging religion; 3) excessively entangles the government in religion.<sup>(4)</sup>

Every aspect of public religious expression has been assaulted based on this test for the past 50+ years, but all that has come to a screeching halt thanks to the Kennedy case. SCOTUS put an end to it, concluding that the government cannot force people to participate in or provide direct financial support for religious activities, nor can it single out religious groups and individuals for governmental exclusion or censorship.<sup>(5)</sup>

Consider that a WIN for freedom!

## WHAT THE ELITES ARE UP TO NOW Compiled by Candy Giles & Barbara Sieber

The World Economic Forum is a group of powerful people who hold a disproportionate amount of wealth, privilege, and political influence. They meet annually in Davos, Switzerland, and are referred to as the "Elites."<sup>(1)</sup> They have just finished this year's convocation regarding their current crisis—climate change. What they have in mind (for us peons) is a tyrannical, top-down collectivized, controlled society. They will accomplish this by The Great Reset.<sup>(2)</sup> This is how they instructed those assembled—the heads of countries, states, industries, and influencers—to go about it:

Control the language and information—you control the warfare. Make all "misinformation" sound perilous, dangerous, and deadly. Tyranny and insurrection are happening everywhere and it's all due to "misinformation."

Label all information you don't like as misinformation.

Pressure governments to label all information they don't like as hate speech. This gets opponents to just stop talking because no one wants to be labeled a bigot or hater. Get this label and you have a lot of angry, self-righteous people trying to get you obliterated.

Pressure corporations worldwide to enforce boycotts against voices the government doesn't like.

Use AI and fact-checkers to pre-censure content they don't like. Stop that content right in its tracks.<sup>(3)</sup>

The focus of the WEF's Great Reset is to push the idea of climate change—which gives power to the elite. They're assuming that people everywhere care more about the climate than literally feeding and warming their starving children.

Notes British satirist Konstantinos Kisin, "If you said to me that I have a choice, either my (infant) son has a serious risk of starving or dying from a preventable disease, or I could press a button and he would live (a good, satisfying life). But all I have to do is press this button and every day of my son's life, a giant plume of Co<sup>2</sup> is going to get released into the atmosphere. And you're all very young. (He was addressing young people at the Oxford-Union debate in England.) Most of you are not parents. Let me tell you something: there isn't a parent in the world who would not smash that button so hard their hand would bleed."<sup>(4)</sup>

His conclusion, innovation is the answer. Not deprivation. And we need to question climate change itself. John Coleman, co-founder of the Weather Channel says it's just not true. "It's politics, not science." Everything is based on a lie.<sup>(5)</sup>

Here are some absurdities and strange facts to note. If it were not so serious, it could be comical...

Billionaires, among the 2,700 leaders from 130 countries—including 52 heads of states and government—arrived in carbon emitting private jets and helicopters to discuss how to save the planet from carbon emitting people and cows (climate change).<sup>(6)</sup>

Al Gore ranted about rain bombs, burning oceans, climate refugees and other ways we "peasants" are ruining the earth.<sup>(7)</sup>

Pfizer CEO Bourla was confronted by Rebel News over the Covid shot's ineffectiveness and side effects. He was *silent*.<sup>(8)</sup>

Humans Rights Watch Director trashed Hungary and Poland for championing traditional family values.<sup>(9)</sup>

High end "call persons" were made available to elites at up to \$2500 a night!<sup>(10)</sup>

# WHAT HE SAID, WHAT HE DID

By Barbara Sieber

U.S. Rep. Jim Jordan is leading the investigation into Dr. Fauci's Covid management "style". On Jan 10, Jordan questioned Fauci on what he knew, what he did, and what he did not do to protect us.

## Facts Fauci KNEW:

Tax dollars which went to the EcoHealth Alliance were then funneled into Wuhan Institute of Virology.

EcoHealth was given an exemption from the pause of gain-of-function research (by Fauci) which allowed research to develop lethal weaponry from initial research.

Security standards were deficient.

EcoHealth was not in compliance with its grant reporting requirements and wasn't adhering to the contract.

Gain-of-function research was conducted in the Wuhan lab.<sup>(1)</sup>

Standard P3CO interagency review process<sup>(2)</sup> wasn't followed in approving the grant to EcoHealth.

And Fauci knew the virus likely came from that lab financed by U.S. tax dollars, ultimately killing six million around the world.

With all of this knowledge, what did Fauci do to protect us on Feb. 1, 2020, as his position required? He did not tell the President, his chief of staff, the HHS Secretary (his boss), or fellow doctors. Instead, he organized a call with Dr. Francis Collins and 11 international virologists who had received previous funding from him for years. The scientists initially stated they felt it was "engineered, virus not consistent with evolutionary theory." Three days later, they changed their tune declaring that only conspiracy theorists would claim that.<sup>(1)</sup>

## Fauci SAID:

It wasn't our tax dollars

Wasn't gain-of-function

Wasn't a lab leak

The vaxxed cannot transmit the virus

No such thing as natural immunity<sup>(1)</sup>

Note: January 16, 2023: The Epoch Times reports "Subvariant XBB.1.5 Could Be More Likely to Infect Vaccinated: NYC Health Officials."<sup>(3)</sup>

Dr. Anthony Fauci was the CDC government official in the war on AIDS. Under his watch, the AZT AIDS cocktail was created. The AZT cocktail is now believed to be responsible for the death of many. Not AIDS. So it's the cure that kills and history repeats itself.<sup>(4)(5)</sup>

# GOT GAS??

By Laurie Ortiz

NO...not THAT kind! I'm talking about the kind millions of Americans want to cook with! Well, at the moment we can cook with gas, but if NY Governor Kathy Hochul gets her way, by 2030 gas stoves and other gas appliances will be a part of history in our state.

Gov. Hochul quietly slipped a proposal to ban gas stoves into the budget, to be voted on in April. The governor's office confirmed that the proposal applied to residential, mixed-use, and commercial—with no exceptions.<sup>(1)</sup> The proposal states that gas appliances can no longer be manufactured after 2030 for smaller buildings and 2035 for larger buildings.

Melissa Fleischut, President and CEO of the New York State Restaurant Association, is worried the proposal could have negative effects toward businesses.<sup>(2)</sup> Hochul's proposal would ban natural gas connections to all new buildings by 2027 and could cost upstate New York households more than \$27,800 each, according to a Consumer Energy Alliance analysis released in Nov. 2022. The forced electrification of buildings would affect 62% of New York households with gas cooking appliances and 57% that use natural gas heat. Not to mention that it will also add to the strain on our electric grid.<sup>(3)</sup>

The governor says that this ban will help the state reach its climate goal of zero emissions, and will help diminish newly cited health risks. However, "The U.S. Consumer Product Safety Commission and Environmental Protection Agency does not present gas ranges as a significant contributor to adverse air quality or health hazard in their technical or public information literature, guidance, or requirements. The Federal Interagency Committee on Indoor Air Quality (CIAQ) has not identified natural gas cooking emissions as an important issue concerning asthma or respiratory illness."<sup>(2)</sup>

New York State Senator Jacob Ashby has begun the "Just Say No to the Gas Stove Ban!" petition. To sign and make your voice heard, follow this link: <https://www.nysenate.gov/petitions/jacob-ashby/just-say-no-gas-stove-ban>.

## COST TO UPGRADE:<sup>(3)</sup>

ELECTRIC PANEL:  
(per panel)  
\$1617 - \$1966

ELECTRIC WATER  
HEATER:  
\$1621 - \$2032

ELECTRIC RANGE:  
\$959 - \$1943  
(July 2022 prices)

# DANGER ZONE: LIBERAL ARTS COLLEGES

By Candy Giles

Conservative college students spoke anonymously to the Epoch Times about the “anti-white, anti-Christian, and anti-American” environment on their campus and classrooms—which makes them uncomfortable at best and threatened at worst.<sup>(1)</sup> This is not a isolated experience; it happens in colleges and universities across America.

Learning Critical Race Theory began at the college level (before being taught to K-12) and is a problem for conservative students nationwide. Some have had their grades affected if they disagree with a professor. Other issues pushed on students by professors are progressive views on gender identity, “queer theory,” religion, systemic racism, climate change, immigration, globalization, Constitutionalism, and Marxism.<sup>(1)</sup>

Students are often encouraged to report other students for bias or “wrong beliefs.” Some conservative students have chosen to hide their true beliefs in order to get the education or degree they desire. Some express concern that they’ll end up “brainwashed.”

In an article, a liberal writer sarcastically asks, “Is America’s university system a repressive thought factory bent on infecting vulnerable young minds with virulent socialist propaganda as part of a sweeping radical leftist global conspiracy aimed at reducing the United States to a totalitarian communist dictatorship? And if so, how come they never mention that in any of the brochures?”<sup>(2)</sup> Many conservatives believe this is absolutely true.

Christian students and their parents will have to seek God’s wisdom and direction, and understand what they might face when it comes to college, or try to find alternatives. It is encouraging that Governor Ron DeSantis is starting to pushback, to end CRT and other anti-American, anti-Christian teaching in Florida’s colleges.<sup>(3)</sup> Hopefully other states will follow, giving conservative college students more options.
